

Meet Tango Super PC: The World's Most Powerful Cell Phone Size Mainstream Windows PC

Take One PC Everywhere for Everything

For the first time ever, through our patent pending technology, a PC is separated from its heatsink and fan. The result is a massive 35 watt PC in a cell phone size, weighing only 7 ounces, with no vents and no fan.

One PC Everywhere for Everything

Carry Tango PC in a shirt pocket or a purse everywhere. All your applications, data, PC Games, and Full Windows OS go with you. Tango is with you everywhere for everything.

Get rid of the clutter of multiple desktop PCs, IPTVs, HTPCs, PS3s and Xbox360s. Life is simpler with a single, remarkably Personal PC with bare-hands-bare-shoulders mobility.

Tango runs Windows 7/8.1, Linux, and Chromium, with no special drivers.

The Docking Station has all the needed ports. A docked Tango PC instantly morphs into a Work PC, Gameable PC or Entertainment PC, with all lights, sound and action gadgets connected. Place these inexpensive docking stations where you work, watch or play.

Tango PC has a 25W i3-class quad-core 2GHz CPU with gaming GPU. RAM and SSD are user-upgradable up to 8GB and 1TB respectively with off-the-shelf parts.

You can save \$\$\$ in hardware and software costs, if you replace a work PC, a Gaming console and a Home PC, with Tango.
